Connector
Volunteers

Our program aims to bring community champion connector volunteers together with people living with dementia and their care partners for social engagement opportunities

The Dementia Connections is meant to create a community that is supportive and accepting, where people living with dementia feel safe and welcome. The enhanced opportunity for social engagement will increase their quality of life and provide them with needed support.

As a connector, you will provide one-on-one companionship and general support to a family living with dementia. Activities may include going for walks, going to the gym, recreational activities, community events and friendly visiting.

If you have a caring heart, a passion for connecting with others, and interest in dementia – we want to hear from you.

The project commitment is flexible and could include 1-4 hours every week.

Gain experience and receive a written and/or oral reference after at least three months of satisfactory services.
