## **Hiring a Snow Removal Contractor**

- Ask for references and check them out.
- Get several estimates and ask the contractor about additional charges and price options.
- Make sure you know what services you are getting - find out exactly what is included in the estimate.
- Do not settle an agreement over the telephone - a face to face meeting where the contractor provides you with a written agreement is important.
- Always get a receipt.
- Make sure your expectations are realistic - keep in mind that a snow-storm makes travelling difficult.
- Check with the Better Business Bureau for reliability reports or a listing of their members.
